 - Known for using managerial qualities to enhance productivity and prevent potential dilemmas within the company.
 - Efficient in several mathematic capabilities, such as calculating weight and balance factors, interpreting diagrams and loading charts, electronic principles, etc.
 - Top-notch technical training and experience from the United States Air Force; 7 ½ years of service.
-

PROFESSIONAL EXPERIENCE

ELECTRONIC TECHNICIAN

Rohmann Services Inc.

August 2009-December 2009

Andrews Air Base, Maryland

A United States Air Force contracting firm charged with maintaining measurement and test equipment used to ensure the reliability and accuracy of Air Force weapon systems.

- Hand selected by management to help start-up new contract for Air Force calibration laboratory.
- Trained three new employees on Air Force metrology practices, calibrating, aligning and repair of test measurement equipment.
- Performed equipment maintenance using theories of operation, block diagrams, schematics, logic trees, and software diagnostics.

DATA COLLECTION & TEST CONSULTANT

LUMEnergi

June 2009-July 2009

Grass Valley, California

Based in Newark, California, LUMEnergi is privately-held and venture-funded by Noventi Ventures and Low Carbon Accelerator Limited. LUMEnergi products consist of lighting ballasts and control systems.

- Conducted testing on different types of fluorescent light bulbs operated by company's manufactured ballast.
- Data collected and sent to design engineers for further analysis.
- Operated temperature chamber, transformer, oscilloscope, multimeter, software programmer (MyLabs), and computer database applications.

CIVILIAN CONTRACTOR (US ARMY)

KBR

August 2008-May 2009

Bagram Air Base, Afghanistan

A United States Army initiative that provides support from civilian contractors for military troops operating in wartime and in other contingency situations.

- Positions Held: Test Measurement Diagnostics Equipment (TMDE) Foreman, Radio Repair Technician

- Managed laboratory production; Oversaw database of 7,000 equipment items, adjusting an average of 15 equipment items per day; Organized parts and inventory procurement orders.
- Calibrated TMDE in physical dimensional, low frequency, and high frequency areas.
- Handle walk-in appointments; Provide support for customers and help them with their account requirements, equipment repairs, and facility maintenance.
- Chosen and authorized by management to improve efficiency within the company; Reduced the delinquency rate from 9% to 4.5%; Enhanced weekly turn-around (production rate) from 11 days to 7 days.

LOAD MASTER JOURNEYMAN C-130/H AIRCRAFT

UNITED STATES AIR FORCE (USAF)-37TH AIRLIFT SQUADRON

November 2006-July 2008

Various Cities (Worldwide)

A squadron of the USAF that was assigned to Ramstein Air Base, Germany, and it contributes to air operations in support of the United States, NATO, and Southwest Asia. It manages 250 personnel.

- Directed ground personnel, who handle loading and offloading operations; Performed all appropriate preflight and post flight aircraft inspections and investigations.
- Operated aircraft systems for loading/offloading operations; Arranged aircraft cargo loads, ensuring that cargo is properly restrained for flight; Processed aircraft weight and balance information.
- Completed aircraft preparation, including rigging airdrop equipment, materials, and paratroopers for aerial delivery missions; Maintained copies of transportation documents for future references.

ELECTRONIC TECHNICIAN CRAFTSMAN/SUPERVISOR

February 2001-October 2006

- Managed a staff of 8 employees, who carry out assigned maintenance functions in the AC/DC low frequency section; Classified essential equipment and its impact on workload.
- Evaluated procedures for storage, inventory, and inspection of property; Maintained and tracked over 14,000 units of equipment inventory with automated database.
- Directed section stock levels of expendable items; Prepared written request forms for equipment items through base supply and tracked down substitute items when items ordered are not available.
- Performed inspections and coordinated inventory during a 30-day project for Air Force Research Laboratories for compliance with Air Force Metrology program (ISO 9000); Finished project 8 days early.
- Produced appropriate information (maintenance schedules, master inventories, and deficiency reports) and distributed them to customers and laboratory management on a monthly basis.
- Synchronized maintenance calibration requirements, storage requirements, and equipment supply requirements to a customer base of 450 clients; Provided training and assistance to customers.
